- Performs tasks necessary to support design, QA and implementation teams necessary to rollout product.
- Research, design, write, test and implement new software applications and systems.
- Modify and enhance existing complex applications and systems.
- Champion change; drive and set technical direction for the functional group.
- Responsible for quality assurance review.
- Acts as project leader for projects with small budgets or limited duration.
- Propose and split large architectural objectives into smaller incremental objectives
- Evaluate design alternatives, and perform cost benefit analysis
- Required to perform duties outside of normal work hours based on business needs.

Core Competencies

- Expertise in designing programs, applications and systems
- Constantly updating technical knowledge and skills and mentoring others to increase the skill level of the department
- Ability to convey technical and conceptual ideas/topics to non-technical personnel
- Presentation
- Strong organizational or Project Management skills
- Ability to design systems with Infrastructure, Network and server operations team in building complex enterprise level applications.

Job Requirements /Technical Knowledge

- Experienced and preferable certified in Amazon Web Services (AWS) and Salesforce technologies
- Typically 7+ years of directly related experience

- Experience working with distributed team is preferred
- Fluent multiple application development languages at an expert level
- Experience with various computer platforms and application environments
- Expertise with developing multiple tiers of multi-tiered software applications
- Must have conceptual understanding of domain technologies.

Physical Demands

Physical demands are representative of the requirements necessary for an employee to successfully perform the essential functions of this position. The employee is required to actively listen and communicate clearly. The employee is required to stand and publically speak. The employee is required to walk, reach with arms and hands, climb, balance, twist, lean, move from one location to another, and to stoop, kneel, crouch or crawl. Vision abilities required by this job include close and far. Ability to operate a computer keyboard and mouse, and lift files and reports is required.
